

Our services platform

By Mohammed Alharbi

15-09-2022

خدماتنا

Goal

Facilitate the process of
providing freelancing
services & **reaching** free
lancing services in
Oman.

Why ?

No unified platform

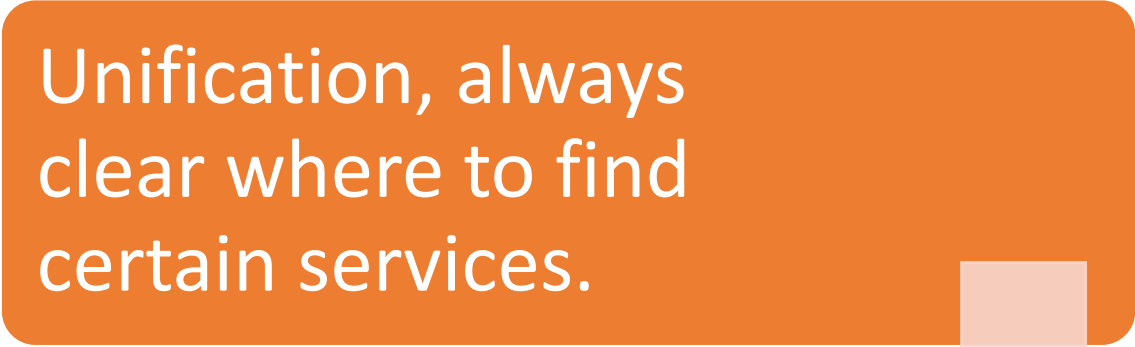

Most popular platform used is Instagram to reach/provide freelancing online.

Small segment of people go in person to search for services.

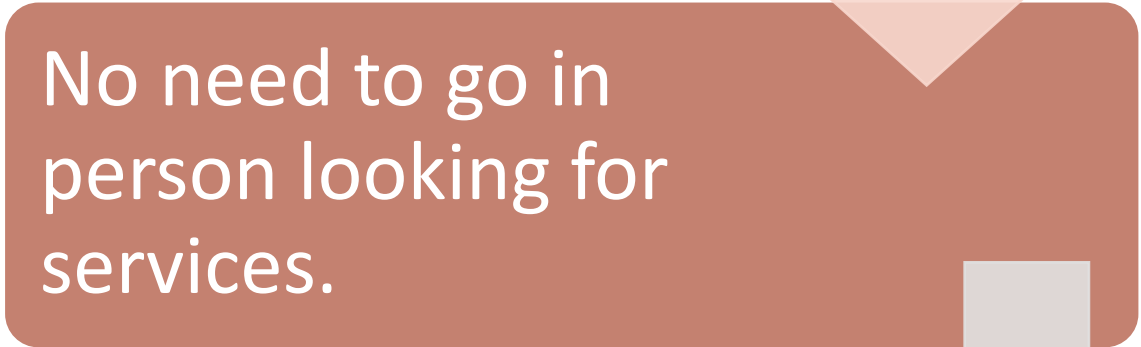

Small segment provide services (ex. car washer waiting people at park).

+ Benefits ?

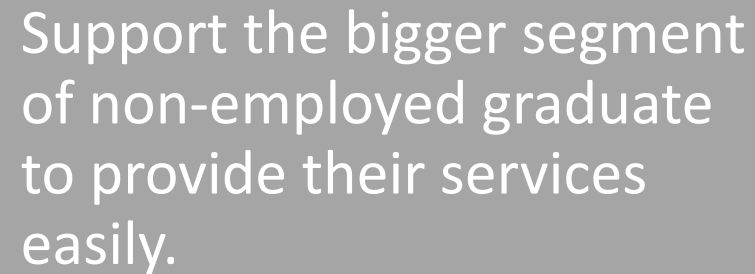

Unification, always
clear where to find
certain services.

No need to go in
person looking for
services.

Support the bigger segment
of non-employed graduate
to provide their services
easily.

Roles and permissions

4 ROLES

Admin – Full access & platform configuration & overview insights

Freelancer – provide bio info & service description & receive payments

Seeker – search freelancers & pay for service & contact & estimate service price

ViewOnly - search freelancers & estimate service price

Technologies ?

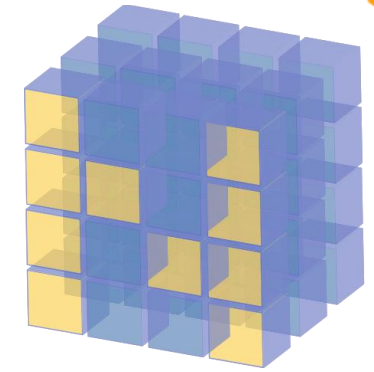

Hugging Face

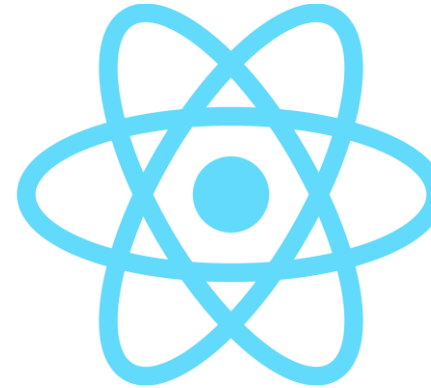

Keras

Google Cloud

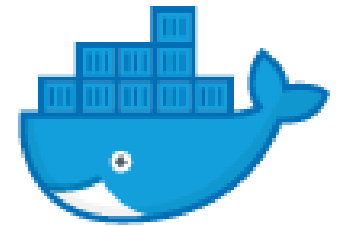

NumPy

بنك مسقط
BankMuscat

mongoDB

docker

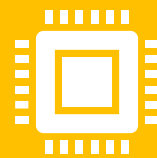

Business model

There is not any kind of payment for the platform owner.

It is possible to contact the freelancer and pay cash after executing the service.

The platform produces huge user database which can be sold / create advanced API data system for commercials.

Why this project fits the semester LO's ?

There are many technologies that need to work together and deploy / hosted in a website.

The platform works 24/7 with many users across the country

The use of DOT framework is quite high ,, lot of research required for each system.

Usage of micro services per system & implementation of security measurements and quality code
